

ACADEMIA DO CAFÉ®
Paixão, café & formação

Our Coffees

Specialty Coffee is a name used to designate the best coffees worldwide, having a unique quality, unique taste and different personality, superior to the drinks served in most locations.

A Specialty Coffee holds certifications that require the producing farm to have social and environmental responsibility, and a high standard of quality in cultivation and selective and manual harvesting, which must be extended to the roasting and packaging. The result is a sustainable and controlled-source product, and of course with a unique flavour.

For you, we select the best Specialty Coffees from each crop and develop specific roast profiles to each of these micro lots, with the aim of highlighting the full potential of each one.

We are perfectionists, methodical, and above all, passionate about coffee. The result of such dedication is quality in all the coffees we sell, which can be perceived both by laymen as by the most demanding experts.

Contact us if you want more detailed information about any of our Specialty Coffees.
